Qualifications

University of Suffolk

BA Hons: Computer Games Design 2:1

The Royal Hospital School

A-Level: Maths, Chemistry, Physics. AS-Level: Music
9 GCSEs (A to C): Maths A, English C

Experience

- 2019 - Present [Switch Studios \(Ipswich\)](#)
Developer on several high-quality Roulette games such as European Roulette, American Roulette. I worked on Multifire Roulette from start through to its release at the tail end of 2020.
- 2021 [Voxel Fighting Game](#)
A WIP Multiplayer, Voxel based PVP game. Currently supporting efficient mesh generation and chunk generation with minimal impact on player experience during mesh rebuilds.
- 2019 [VR/AI Research Platform \(Remote\)](#)
Worked with a PhD Student to create a platform for their research involving VR and AI.
- 2018 - Present [Disco Kitty](#)
Originally created for Ludum Dare, Disco Kitty is a physics puzzle game for Android where the player manoeuvres cats on roller skates to the dance floor so they can dance to the music.
- 2017 - 2018 [Procedural Vegetation Tool](#)
Tool for Unreal Engine 4 that can populate a landscape actor with vegetation procedurally. Custom Blueprint nodes were made in C++ to extract various data for non-programmers to use in Blueprint scripts.
- 2017 - 2018 [Unicorn Button](#)
Designed with the intent of creating a game which is not "Fun". Though players got frustrated they also become addicted and would retry to beat the score or see more of the story.
- 2016 - 2017 [Icebreaker \(Artifaction\)](#)
A short horror game experience in UE4 made with 3 other students at University. I created puzzles, the AI and a tile-based level design tool.
- 2016 - 2017 [Rendering Engine \(Dissertation project\)](#)
As part of my studies, I created a Rendering engine with C++ and DirectX 11.
- 2015 - 2016 [Text Adventure Game/Engine](#)
I created a text adventure in C# as part of a programming assignment, the engine uses an input parsing algorithm I designed inspired by the game Zork.
- 2008 - 2014 [Community Action Team – CAT \(School\)](#)
I was an active member of the CAT at school where I helped at the Wolverstone Project where I was able to use my skills as a dingy sailor to teach children and adults with mental and physical disabilities to sail.

Programming

Typescript
C++
Rust
C#
D3D11
OpenGL, WebGL
Shaders: HLSL, GLSL
HTML / CSS

Software

VS Code
Node / NPM
Git, Gitkraken,
Sourcetree
Jira
Unity3D
UE4
3DS Max, Blender

Other Skills

Agile: Scrum/Scrumban
Code Review
Collaboration
Negotiation
Design Patterns
Entity Component
Systems

Interests

Roller Derby
Computer Games
Game Jams
Space/Astrophysics
DJing
Singing
Theatre: Acting/Tech
